
Syllabus: Estimating for Electrical Contractors (EEC)

The EEC course is designed specifically to meet the needs of Electrical Contractors (EC) and their estimating requirements. Those who should attend are EC's who want to maximize their efforts while generating more accurate estimates. Electricians who may want to begin estimating will also find this course useful to their goals. The course is broken out into five classes as follows:

Module I

Estimate set-up, Quoted material takeoff

Module II

Commodity branch takeoff

Module III

Extension, quoted material and commodity material review, Job total, Proposal

Module IV

Change Order preparation
Review

Module V

Test
Introduction to Computer Estimating

Benefits:

Upon completion each attendee will have a working knowledge of how to complete a basic electrical estimating. All attendees will be tested and awarded a Certificate of Completion upon successfully demonstrating a satisfactory knowledge of the course content.
